SUPPLY CONSTRUCTION PROJECTS WITH PLASTIC, GLASS EQUIPMENT;
LIQUIDATE LEATHER SUBSTITUTES PLANT

SUPPLIES PLASTIC ELECTRICAL PRODUCTS TO CONSTRUCTION PROJECTS -- Moscow, Ve-
chernyaya Moskva, 4 Jun 51

The Orekhovo-Zuyevo Karbolit Plant has already supplied the great con-
struction projects with more than 200,000 different plastic products. They
include switches, electrical ceiling fixtures, electric and radio sockets,
etc. The plant won second place in the all-Union socialist competition of
enterprises of the chemical industry.

TO SEND LINOLEUM TO CONSTRUCTION SITES -- Riga, Sovetskaya Latviya, 7 Jun 51

The Lepaya Linoleum Plant has received a large order to produce linoleum
and Linkrusta for the great construction projects. It has resolved to produce,
and to ship to the construction sites by 10 July, the entire output it was to
produce in the third quarter.

TO SHIP 150 AIR BRUSHES TO VOLGA-DON PROJECT -- Riga, Sovetskaya Latviya,
1 Jun 51

The Novo-Vil'nys Painting Apparatus Plant is fulfilling its intention
of producing, in 1951, 1,000 additional painting apparatuses for the great
construction projects from materials saved. The first 150 air brushes were
prepared for shipment to the Volga-Don construction site ahead of schedule.

DELIVERS WINDOW GLASS TO CONSTRUCTION SITE -- Moscow, Trud, 8 Jun 51

The Ashkhabad Glass Plant imeni Kalinin has fulfilled its first order for
the Kara Kum construction project [the Main Turkmen Canal]. It has already de-
livered several carloads of first-grade window glass to Takhia-Tash ahead of
schedule.

INCREASE VARIETY OF GLASS PRODUCTS -- Riga, Sovetskaya Latvya, 10 Jun 51

The Riga Kommunar Glass Plant has organized the production of colored glass. This has made it possible to increase the range of products and to make new patterns of tableware of exquisite form and artistic finish. A so-called "potter's" kiln has been specially constructed for the production of colored glass, and in it glass of different colors, such as blue, rose, and green, is produced simultaneously.

Recently, the plant began to produce electrical fittings, flower vases, and other milky glass products, which are much cheaper than frosted glass and more beautiful.

CONSTRUCT NEW GLASS PLANT AT LENINABAD -- Moscow, Izvestiya, 13 Jun 51

A large glass plant has been constructed at the location of the glass shop at the Leninabad Canning Combine imeni Mikoyan. Its chief function will be to supply glass containers to many enterprises of the Tadzhikistan food industry.

LIQUIDATE SYNTHETICS PLANT -- Moscow, Moskovskaya Pravda, 7 Jun 51

On 1 June, the Executive Committee of the Moscow Soviet decreed the liquidation of the Rezinoplastmass Plant, at 79, Vtoraya Meshchnaskaya Ulitsa. The plant, which belongs to the Local Industry Trust of Dzerzhinskiy Rayon, is to be turned into a boarding house.

The plant was organized at the initiative of the Executive Committee of the rayon soviet at the site of a former haberdashery factory. Rayon industrial enterprises equipped it for the production of leather substitutes. The plant was the first in the local industry system to organize the output of "tekstovinit" and products made from it at its own raw materials base. The plant also provides the Moscow motor bus, trolley bus, and streetcar establishments with "tekstovinit."

The plant's growing productive capacity, its profitable operation, and the constant marketability of its output through the years testify to its soundness. The liquidation of the plant poses a serious threat to the fulfillment of the production plan and the stock plans of the trust as a whole.

The liquidation runs counter to the decrees of the Council of Ministers RSFSR of 17 March 1951, and of the Moscow Soviet No 24/26, which were directed toward the increased production of leather substitutes at enterprises of local and cooperative industry.
